

HD Construction Equipment Hyundai Europe NV – Foreman mechanic

Do you have a passion for heavy machinery and hands-on technical work? Do you enjoy troubleshooting, repairing and preparing construction equipment while supporting the day-to-day coordination of workshop activities?

As a **Foreman Mechanic**, you will play a key role in supporting EUCUP production activities through machine assembly, troubleshooting, repair and inspection of Hyundai and Develon construction equipment. In addition to your hands-on technical responsibilities, you will help coordinate the daily activities of a small team of mechanics and support the delivery of safe, efficient and high-quality work.

What will you do?

Production Support

- Support production activities for excavators, wheel loaders, forklifts and other construction equipment
- Perform machine assembly, disassembly and modification work for troubleshooting purposes
- Conduct machine inspections and functional checks
- Support machine preparation and customer customisation projects
- Ensure work is carried out in accordance with quality and safety standards

Technical Troubleshooting & Repair

- Troubleshoot and repair mechanical, hydraulic and electrical issues on construction equipment
- Identify root causes of failures and support corrective actions
- Support machine testing, commissioning and validation activities
- Create technical reports and troubleshooting guidelines
- Contribute to continuous improvement through effective problem-solving

Technical Support & Coordination

- Support and guide Aertssen technicians during production activities
- Collaborate with internal and external stakeholders to resolve technical issues
- Coordinate and prioritise daily work activities for a small team of mechanics
- Monitor progress and ensure timely completion of assigned work
- Ensure a high standard of workmanship and technical quality

Quality & Machine Inspection

- Perform sample inspections of completed machines
- Report quality findings and support follow-up actions
- Verify machine readiness before delivery, testing or commissioning

- Support initiatives to improve product quality and production efficiency

What are we looking for?

- Experience in Heavy Equipment, Automotive, Agricultural Machinery or Industrial Maintenance
- Strong mechanical knowledge and hands-on troubleshooting experience
- Basic knowledge of Hydraulic and Electrical Systems
- Experience coordinating or guiding technicians is an advantage
- Ability to organise, prioritise and follow up daily workshop activities
- Construction Equipment Operator Licence is an advantage
- Good command of English
- Basic proficiency in Microsoft Office for reporting and documentation
- Strong problem-solving skills and a proactive mindset
- Team player with a strong focus on quality, safety and continuous improvement
