HYUNDAI

HD Construction Equipment Hyundai Europe NV – Product Compliance Specialist

Do you share our ambition to be the best?

At HD Construction Equipment Hyundai Europe NV, we continuously strive to develop innovative, safe and reliable machines for customers across Europe. To strengthen our Research Center in Tessenderlo, we are looking for a motivated **Product Compliance Specialist** who wants to play a key role in ensuring our products comply with current and future regulations.

Are you analytical, eager to learn and interested in the intersection of technology, safety and legislation? Then this could be the perfect opportunity to build your expertise within an international and future-oriented environment.

What can you expect from this challenging job?

As a Product Compliance Specialist, you are responsible for monitoring, interpreting and applying European and local regulations for our Construction Equipment and Material Handling divisions.

You will:

- Investigate and monitor European and local regulations that impact our products and business.
- Work closely with our R&D teams in Korea to translate regulatory requirements into practical product solutions and ensure they remain informed about legislative changes.
- Explore new regulations related to emerging technologies and digital safety topics such as hydrogen, cybersecurity, artificial intelligence and connected machines.
- Represent Hyundai in meetings with industry organizations, technical committees and regulatory bodies, helping to shape future regulations and standards.
- Build and maintain a strong network with industry stakeholders and explain Hyundai's position on regulatory developments.
- Become the internal specialist for product compliance and provide guidance to colleagues across different departments.
- Support our dealer network and customers with regulatory and compliance-related questions.
- Assist with the application, maintenance and renewal of road homologation files.
- Participate in new homologation projects for current and future product ranges.

Are you the colleague we’re looking for?

- You hold a Bachelor's degree or have an equivalent level through experience.
- You are interested in engineering, technology, legislation or the world of Construction Equipment and Material Handling.
- Experience in compliance, homologation, certification or a technical environment is an asset, but not a requirement.
- You are eager to learn and motivated to develop yourself into a compliance expert.

- You have strong analytical skills and enjoy working with facts, regulations and technical information.
- You have a keen eye for detail and work in a structured and accurate manner.
- You are comfortable working independently while also collaborating with international teams.
- You have a good knowledge of Microsoft Excel.
- You enjoy working on small and medium-sized projects and taking ownership of your responsibilities.
- You thrive in an international environment and enjoy collaborating with different cultures.
- You have a good command of English, both spoken and written.
