

HD Construction Equipment Hyundai Europe – SAP Specialist

We are looking for a motivated **SAP Specialist** to join our IT & Process Innovation Team in Tessenderlo.

What can you expect from this challenging job?

- You will be a part of the IT & Process Innovation team, contributing to the smooth functioning of the SAP landscapes.
- You will arrange user trainings and prepare clear, user-friendly manuals.
- You will act as a change agent and guide users in improving their way of working within the SAP ERP system.
- You will troubleshoot and resolve production system (SAP-PP, MES) issues and provide ongoing support to our EU Customization plant.
- You will build new processes and optimize existing processes.
- You will take a role as internal consultant in different SAP projects throughout the company, from analysis and to-be process design to translating business needs into technical SAP solutions and performing user acceptance testing.

Are you the new colleague we are looking for?

- You have a Bachelor's or Master's degree in an IT related domain or equivalent experience.
- Proven experience as an SAP consultant in the PP module and are preferably SAP certified. Experience in the MM module is a strong plus.
- You have excellent communication skills (writing and reporting).
- You are able to work independently while also thriving as part of a team.
- You are well-organized, a critical and logical thinker.
- Experience in at least one SAP project from start to finish (analysis up until the 'go live').
- You speak fluent English; knowledge of Dutch is a plus.
- You have hands-on experience with MS Office and MS Power BI
- You are eager to grow as an SAP specialist by learning and experiencing small or medium-sized projects.
- You are triggered by an international environment and like to work with different cultures.
- You have experience with, or a strong interest in learning, AI-driven solutions such as AI agents and

Microsoft Power Automate, and you are motivated to actively explore how these technologies can support and improve business processes.
