

## HD Construction Equipment Hyundai Europe – Technical Trainer Construction Equipment

We are looking for a motivated **Technical Trainer** to join the Aftermarket and Product Support department and support the Construction Equipment Dealer network.

### What can you expect from this challenging job?

- You train technicians from the dealer network in several languages (English, French, German).
- You investigate into technical functions of machines and integrate them into training guides (handbooks) and presentation material.
- You organize technical training sessions in cooperation with the training team, mainly in our Belgian based academy (Tessenderlo-Ham) or abroad at dealer's premises.
- You communicate closely with our European aftersales staff on technical matters as well as on dealer specific matters.
- You organize internal trainings for Aftermarket and Product Support staff.
- You communicate closely with our headquarters in Korea.
- You develop and design new innovative training tools (E-learning, multimedia).
- You follow up training quality and improve where necessary.
- You follow up on technical information for new developed machines and necessary tools.

### Are you the new colleague we are looking for?

- You have a technical background through experience or education, combined with a first experience in a related industry.
- You have a good background in electronics, hydraulics, mechanics, engines, powerlines.
- You have experience in presenting technical material, you have excellent pedagogical skills and you get energy from training people.
- You have excellent interpersonal skills.
- You speak fluent French, English and German.
- You have a hands-on mentality.
- You are willing to travel to your dealer network within Europe, if required.
